## Positive Results; Better than Expected Margins

Wiit reported solid 1Q results, above our projection in terms of profitability. Looking at outlook, management confirmed positive momentum across the commercial pipeline and reiterated its confidence in further margin expansion as integration synergies materialise over the next 12 months. In particular, management reiterate its expectation to grow high single-digit in Italy and mid-single digit in Germany (organically). Wiit remains well-positioned to benefit from secular cloud adoption trends, especially in mission-critical and secure environments, while offering high visibility on organic growth and cash generation. BUY rating and TP of EUR 25.0 confirmed

#### Wiit delivered a solid start to the year

1Q revenues reached EUR 41.1M, up 22.6% yoy (+0.8% vs our estimate), supported by organic growth in ARR (+4.6%) and the contribution from recent acquisitions (Edge&Cloud, Econis AG, Michgehl & Partner). Recurring revenues accounted for 89.9% of the total, highlighting the strength and stickiness of the business model. We think this provides strong visibility and predictability over future revenue streams. Strategic highlights include the successful launch of the Wiit Cloud Native Platform, which recently won its first large contract in Germany, outperforming US hyperscalers. This positions Wiit as a credible European alternative in a context where data sovereignty is gaining relevance.

#### Margin trends reflect integration phase

Profitability remained healthy, with adjusted EBITDA rising 21.0% yoy to EUR 15.8M (6.6% above our forecast), although the margin slightly diluted to 38.4% (vs. 38.9% in 1Q24) due to the inclusion of recently acquired businesses. On a like-for-like basis, the margin would have improved to 42.9% (+400bps yoy), reflecting improved efficiency in Italy and Germany, and a growing focus on high-value services. Adjusted EBIT came in at EUR 7.8M (+8.5% yoy), impacted by higher amortisation linked to recent investments and M&A activity. Adjusted net profit rose by 4.1% yoy to EUR 4.3M.

#### Cash capex confirmed at around EUR 27M (despite high concentration in 1Q)

On the balance sheet, NFP stood at EUR 216.9M (including IFRS 16), slightly up vs. YE24, mainly due to IT infrastructure Capex (EUR 8.2M) and treasury share buybacks. Excluding IFRS 16 and the market value of treasury shares, adjusted net debt was EUR 176.0M. Operating cash flow stood at EUR 15.7M. As regards M&A, the company is working on a couple of dossiers. The focus remains to continue to expand its presence in the DACH region. Overall, possible targets could be small/medium-sized companies offering high potential cost synergies.

#### Valuation methodology (long-term horizon: 12M)

The Intesa Sanpaolo SpA Equity Research Department values the companies for which it assigns recommendations as follows:

We obtain a fair value using a number of valuation methodologies including: discounted cash flow method (DCF), dividend discount model (DDM), embedded value methodology, return on allocated capital, break-up value, asset-based valuation method, sum-of-the-parts, and multiples-based models (for example PE, P/BV, PCF, EV/Sales, EV/EBITDA, EV/EBIT, etc.). The financial analysts use the above valuation methods alternatively and/or jointly at their discretion. The assigned target price may differ from the fair value, as it also takes into account overall market/sector conditions, corporate/market events, and corporate specifics (ie, holding discounts) reasonably considered to be possible drivers of the company's share price performance. These factors may also be assessed using the methodologies indicated above.

#### Equity rating key: (long-term horizon: 12M)

Equity Rating Key (long-term horizon: 12M)

From 22 November 2024, in its recommendations, Intesa Sanpaolo SpA uses a relative rating system on a 12M horizon, whose key is reported below. Intesa Sanpaolo's investment ratings reflect the analyst's/analyst's team assessment of the stock's total return (the upside or downside differential between the current share price and the target price plus projected dividend yield in a 12M view) as well as its attractiveness for investment relative to other stocks within its coverage cluster.

A stock's coverage cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector or other classification. The list of all stocks in each coverage cluster is available on request.

Long-term rating	Definition
BUY	BUY stocks are expected to have a total return of at least 10% and are considered the most attractive stocks in the
	analyst's/analyst's team cluster in a 12M period.
NEUTRAL	NEUTRAL stocks are expected to have a total return of at least 0% and are less attractive stocks than BUY rated stocks in
	the analyst's/analyst's team cluster in a 12M period.
UNDERPERFORM	UNDERPERFORM stocks are the least attractive in a coverage cluster in a 12M period.
RATING SUSPENDED	The investment rating and target price for this stock have been suspended as there is not a sufficient fundamental basis
	to determine an investment rating or target price. The previous investment rating and target price, if any, are no longer
	in effect for this stock.
NO RATING (NR)	The company is or may be covered by the Research Department but no rating or target price is assigned either
	voluntarily or to comply with applicable regulations and/or firm policies in certain circumstances.
TENDER SHARES (TS)	We advise investors to tender the shares to the offer.
TARGET PRICE	The market price that the analyst believes the share may reach within a 12M time horizon.
MARKET PRICE	Closing price on day prior to issue date of the report, as indicated on the first page, except where otherwise indicated.
Note	Intesa Sanpaolo assigns ratings to stocks as outlined above on a 12M horizon based on a number of fundamental drivers
	including among others, updates to earnings and valuation models. Exceptions to the bands above may occur during
	specific periods of market, sector or stock volatility or in special situations. Short-term price movements alone do not
	imply a reassessment of the rating by the analyst.

**Important Note**: The current rating system has been in place since 22 November 2024. On 7 April 2025, the rating names were subsequently updated to BUY (previously BUY), NEUTRAL (previously HOLD) and UNDERPERFORM (previously SELL) on an unchanged rating methodology. Please refer to the ISP Equity Rating informative note of 22 November, subsequently updated on 7 April 2025, for further details at the following link: https://group.intesasanpaolo.com/it/research/equity—credit-research. Intesa Sanpaolo had previously used an absolute rating system based on the following ratings: BUY (if the target price is 10% higher than the market price), HOLD (if the target price is in the range 10% below or 10% above the market price), SELL (if the target price is 10% lower than the market price). After 22 November 2024, analysts review and assign ratings on their coverage according to the rating system presented above. For additional details about the old rating system, please access research reports dated prior to 22 November at https://cardea.intesasanpaolo.com/homepage/#/public or contact the research department.
