M&A synergies to support margin expansion

2Q24 in line, margins penalised by dilutive M&A

On August 1st, WIIT released 2Q24 results, which were overall aligned with our estimates, highlighting a mid-single-digit organic growth with 300bps of adj. EBITDA margin dilution due to the consolidation of recent M&A deals. In details, in 2Q24 the company reported sales at €39.2m, up 21% YoY (+4% YoY organically) and in line with our estimates. Organic growth was driven by both the domestic market (+5% YoY) and Germany (+4% YoY), while E&C and Econis contributed for €2.1m and €3.4m revenues, respectively. Adj EBITDA was €13.7m, up +11% YoY and 2% ahead of our forecast. The margin contracted by c.3.0pp to 34.9% due to the consolidation of dilutive M&A. On a LfL basis, the margin would have expanded by c.270 bps driven by both the domestic business and Germany. Adj. net profit stood at €3.2m, up 16.6% YoY and a touch below our estimates due to higher financial charges. Net debt reached €220m, in line with estimates, expanding vs 1Q due to M&A and dividend cash-out.

High-single-digit sales organic growth outlook confirmed for FY24E

During the call, the management confirmed the high-single-digit top-line organic growth outlook for FY24E, which should be supported by the positive business pipeline. The integration of the latest deals is proceeding in line with plans and synergies are expected to be visible as soon as 2025E. Cash generation is seen improving over the next quarters, as 1H performance has been impacted by some NWC build-up and the payment of M&A earn-out, with the management anticipating a NFP of ~€200m at year-end. On future business developments, the management may plan to build one data center specifically devoted to AI, which could offer customers adequate computational power requirement to perform these applications. The M&A campaign is seen continuing, with the management scouting for further bolt-on deals in the DACH area that should not require any additional financing requirements.

FY24-26E EPS trimmed to reflect higher D&A and financial charges

We fine-tuned out estimates, trimming FY24-26E EPS by 2% on average, as we factor in higher D&As and financial charges. For FY24E, we confirm our ~8% sales organic growth forecasts, which implies a mild acceleration in the growth pace over 2H24E to be favoured by easier comparison base and new contracts signed. We expect adj. EBITDA margin to reach 34.9%, down vs 39.0% in FY23 due to dilutive M&A. Going forward, we broadly confirm our ~6% organic CAGR in sales over FY25-26E, supported by the positive business pipeline, with synergies from M&A integration expected to drive ~140bps of annual EBITDA margin expansion to reach 37.8% in FY26E. On cash generation, we factor in higher M&A cash-out and some NWC absorption, projecting WIIT to reach €200m net debt at YE24E.

Solid growth profile at full multiples; Neutral, €21.6/share TP (from €21.0)

We lifted our TP to €21.6/share from €21.0/share, reflecting recent peers' rerating more than offsetting the EPS revision. On our new 2024E numbers, the shares trade on ~15x EV/EBITDA and ~38x adj. P/E, a level that in our view already fairly reflects the growth potential of the story. Therefore, we confirm the Neutral Source: Mediobanca Research rating on the name.

_

Unless otherwise stated in the text of the research report, target prices are based on either a discounted cash flow valuation and/or comparison of valuation ratios with companies seen by the analyst as comparable or a combination of the two methods. The result of this fundamental valuation is adjusted to reflect the analyst's views on the likely course of investor sentiment. Whichever valuation method is used there is a significant risk that the target price will not be achieved within the expected timeframe. Risk factors include unforeseen changes in competitive pressures or in the level of demand for the company's products. Such demand variations may result from changes in technology, in the overall level of economic activity or, in some cases, from changes in social values. Valuations may also be affected by changes in taxation, in exchange rates and, in certain industries, in regulations. All prices are market close prices unless differently specified.

Since 25 September 2017, Mediobanca uses a relative rating system, based on the following judgements: Outperform, Neutral, Underperform, Not Rated, Coverage suspended and Restricted.

Outperform (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 6-12 months.

Neutral (N). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 6-12 months.

Underperform (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 6-12 months.

Not Rated (NR). Currently the analyst does not have adequate confidence about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage, on a risk-adjusted basis, over the next 6-12 months. Alternatively, it is applicable pursuant to Mediobanca policy in circumstances when Mediobanca is acting in any advisory capacity in a strategic transaction involving this company or when the company is the target of a tender offer.

Restricted (R). Any kind of recommendation on the stock is restricted pursuant to Mediobanca Research and Trading restriction directive in circumstances where the bank is performing an Investment Banking role in Capital Markets or M&A transactions.

Coverage suspended (CS). The coverage is temporarily suspended due to endogenous events related to the Equity Research department (reallocation of coverage within the team, analyst resignation, etc.)

The recommendation relies upon the expected relative performance of the stock considered versus its benchmark. Such an expected relative performance relies upon a valuation process that is based on the analysis of the company's business model / competitive positioning / financial forecasts. The company's valuation could change in the future as a consequence of a modification of the mentioned items.

Please consider that the above rating system also drives the portfolio selections of the Mediobanca's analysts as follows: long positions can only apply to stocks rated Outperform and Neutral; short positions can only apply to stocks rated Underperform and Neutral; portfolios selection cannot refer to Not Rated stocks; Mediobanca portfolios might follow different time horizons.
