

PRESS RELEASE

WIIT: multiyear contract signed for an overall value of around Euro 5.3 million with F.I.L.A. S.p.A., a company of primary importance in the consumer goods sector

The new project is in line with the need to manage the growing complexity of the business and to guarantee its security, key features of the Hybrid Cloud and Hosted Private Cloud service provided by WIIT

Milan, 19 March 2019 – WIIT S.p.a., one of the leading Italian players in the Cloud Computing services for businesses market, focused on the delivery of continuous Hybrid Cloud and Hosted Private Cloud services for critical applications, headed by its CEO Alessandro Cozzi, has signed a new multiyear contract **with an overall value of around Euro 5.3 million.**

F.I.L.A. S.p.A. (FILA.MI), an Italian company of primary importance and a leader in the Consumer Goods sector, has confirmed its faith in WIIT by launching a major project of technological innovation, implementing an SAP project at the global level based on WIIT's Cloud services and also activating Cloud solutions for Collaboration applications in its local bases, also in USA and Europe, both private and public. All the services will be managed and governed centrally with round-the-clock global support, 7 days a week, with cyber security services and much more besides.

This project is mainly aimed at exercising firm control over all the business processes, (from production to the warehouse and logistics etc.), and ensuring the availability and ease of use of the new systems for a multiplicity of users, providing a solid infrastructure based on an evolved Hybrid Cloud model able to guarantee all future growth in a rapid and secure way and evolve in perfect synchrony with the increase of the complexity and the business.

"We are very pleased with the extension and supplementation of the existing contract that one of our main clients has just signed," said Alessandro Cozzi, WIIT's CEO. "In addition to the renewed expression of faith, which confirms WIIT's growing credibility and uniqueness in the world of continuous Hybrid Cloud and Hosted Private Cloud services for critical applications, this is a contract that encapsulates innovation because it involves the implementation of a Hybrid Cloud model that integrates and completely governs three different types of Cloud on a global scale, guaranteeing the attainment of the utmost in terms of performance, security and scalability."
