

PRESS RELEASE

WIIT and Group E together for a private GenAI platform on WIIT Cloud Native Platform

Milan, 26th February 2025 – WIIT S.p.A. ("WIIT" or the "Company"; ISIN IT0005440893; WIIT.MI), one of the main European players in the market of *Cloud Computing* services for companies focused on the provision of continuous *Private and Hybrid Cloud* services for critical applications, and Group E, a network of players in *information technology* that support Italian companies in the sustainable digital transition, announce their new strategic partnership for the development of a generative artificial intelligence platform.

Within this project, WIIT will host on its *WIIT Cloud Native Platform* (WCNP) the generative AI technology of Group E, conceived and developed by Memori, a company of the group.

Objective of the partnership is to offer companies a secure and efficient GenAI system, based on a private knowledge base platform to protect clients' intellectual property and guaranteed by WIIT's Secure Cloud infrastructure, that integrates cloud and cybersecurity at the highest level.

The latest-generation architectures, designed and managed by WIIT, will ensure a secure, scalable, and stable environment to run Group E AI platform, processing data within the European territory, to guarantee the highest level of regulatory compliance. The integration of WCNP, flexible and innovative platform based on Open Source technologies, and the Group E AI platform will guarantee the highest levels of scalability, security and business continuity available on the market.

The AI technology of Group E, now included in WIIT's offering, will provide clients with an advanced platform for generative conversational artificial intelligence and document intelligence, and optimisation of company knowledge and information processes. Through an intuitive interface, users will obtain accurate and reliable information from the company's information assets, expressing themselves in natural language, available in Italian and in many other languages. Moreover, document intelligence features will enable to extract value not only from information in textual form, but also from static documents and complex databases, simplifying access to information traditionally difficult to find, thus unleashing the full power of the company's information assets.

"As never before, AI is playing a decisive role, a paradigm shift that clearly delineates the future and potential of our customers. Thanks to the partnership with Gruppo E, we want to offer them the chance to build agents based

on generative AI in a simple way, providing the highest standards of security and resilience, factors that have always distinguished WIIT's offering." comments Alessandro Cozzi, CEO of WIIT.

"WIIT is the ideal partner for the dissemination of our technology, a highly competent player that has fully grasped the value of our tools: ease of use, continuous development in line with the evolution of AI, and the capacity to enable companies to make the most of their knowledge capital." declares Stefano Davitti, CEO of Group E.

WIIT S.p.A.

WIIT S.p.A., a company listed on the Euronext Star Milan ("STAR") segment, is a leader in the Cloud Computing market. The company has a pan-European footprint and is present in key markets, such as Italy, Germany and Switzerland, positioning itself among the leading players in the provision of innovative Private and Hybrid Cloud technology solutions. WIIT operates through managed processes, specialised resources and technology assets including proprietary data centres spread across 7 regions: 4 in Germany, 1 in Switzerland and 2 in Italy, 2 of which are Premium Zone enabled, i.e. with Tier IV certified data centres by the Uptime Institute and the highest levels of security by design. WIIT has 6 SAP certifications at the highest level of specialisation. Its end-to-end approach enables the company to provide its partner companies with customised, high value-added services with the highest security and quality standards for the management of critical applications and business continuity, while guaranteeing maximum reliability in the management of the main international application platforms (SAP, Oracle and Microsoft). Since 2022, the WIIT Group has joined the UN Global Compact. (www.wiit.cloud)

Group E (leader Ergon S.r.l.)

Group E, together with information technology players with offices throughout Italy, supports companies in the sustainable digital transition. The group, founded between Florence and Siena 20 years ago, headed by Ergon S.r.l., has witnessed a very rapid expansion of its business in Italy over the last three years, hiring new employees and opening new offices in Bologna, Milan and Pistoia. The group's offer ranges from datacenter services, including design, implementation, business continuity, disaster recovery, networking and unified communication, to those of information security, from security governance to active security and SOC, and support for sustainable innovation, with services related to ESG issues and an important focus on artificial intelligence. Group E positions itself as a point of reference in Italy for linking information technology, sustainability, and territorial development.
