

PRESS RELEASE

WIIT confirmed and selected within the “Broadcom Advantage Partner Program”, a private invitation-only program, as an Authorized VMware Cloud Service Provider (VCSP) in Europe

Milan, 5 February 2026 – WIIT S.p.A. (“WIIT” or the “Company”; ISIN IT0005440893; WIIT.MI), European leader in the market of Private and Hybrid Cloud services for Critical Applications, announces that it has been confirmed and selected as one of the few European partners within the **Broadcom Advantage Partner Program**, a private, invitation-only program that enables WIIT to operate with the status of **Authorized VMware Cloud Service Provider (VCSP)**. This recognition is attributable to the Group’s solid growth over the past five years and demonstrates the effectiveness of the strategic investments made in strengthening data center infrastructures and developing advanced technological expertise.

VCSP Partners stand out for their deep expertise in VMware solutions and a solid track record in achieving high levels of customer satisfaction. These partners typically focus on specific geographical areas and possess robust sales and support capabilities, as well as proven technical validations. They are therefore particularly qualified to effectively meet the managed services needs of clients in their reference regions.

As part of the **Advantage Partner Program**, WIIT will operate across all countries currently served and in future markets entered through upcoming external growth initiatives (M&A), contributing to the consolidation and further evolution of the Cloud4Europe project.

Through its Secure Cloud approach, WIIT offers an integrated bundle of premium technologies and highly-qualified managed services for *VMware Cloud Foundation (VCF)*, delivering a sovereign cloud that ensure data residency, high compliance standards, and full adherence to jurisdictional controls.

WIIT’s proprietary cloud infrastructure spans 7 strategic Regions across Europe, including 3 enabled as Premium Zones, with Tier IV certified data centers by the Uptime Institute and with processes managed by highly qualified staff. This makes it possible to offer VCF services with outstanding reliability, operational continuity, security by design, and total regulatory compliance.

Thanks to this integration, WIIT is able to leverage VMware software’s intrinsic functionalities – such as load balancing, advanced resource orchestration, and high-availability deployment across multiple data centers – ensuring uninterrupted performance, unlimited scalability, and continuous technological renewal. The synergy between the

VMware solutions and WIIT's proprietary infrastructure enables flexible, tailored responses to the diverse needs of businesses, consolidating WIIT's role as a benchmark for innovation and data protection in the European cloud sector.

WIIT, as VCSP Partner and European Cloud Service Provider, will continue to offer its clients in Italy, Germany, and Switzerland advanced management services for virtual infrastructures and critical applications, based on VMware technologies. These services are part of an ever-evolving ecosystem of solutions, designed to support companies on their digital transformation journey and to ensure ongoing innovation, reliability, and security.

Finally, WIIT's broad Cloud services offering, together with the benefits of license portability, enables the Company to support cloud providers currently excluded from the Broadcom Advantage Partner Program, as well as their customers, throughout this transition phase, ensuring uninterrupted service delivery and continuous support

"We are extremely proud to have been confirmed as a VCSP partner within the Broadcom Advantage Partner Program. This recognition reinforces our commitment to providing enterprises with secure and sovereign European private cloud solutions, offering a credible alternative to global hyperscalers. Our collaboration with a partner of excellence such as Broadcom enables us to deliver a cloud experience superior to that of the public cloud, while ensuring higher security, more predictable and competitive costs, and the assurance that data remains under the full control of customers, in full compliance with European regulations. This achievement confirms our determination to lead the digital transformation of enterprises, consistently placing reliability, innovation and data protection at the core of our strategy". **Commented Alessandro Cozzi, CEO of WIIT.**

WIIT S.p.A.

WIIT S.p.A., a company listed on the Euronext Star Milan ("STAR") segment, is a leader in the Cloud Computing market. The company has a pan-European footprint and is present in key markets, such as Italy, Germany and Switzerland, positioning itself among the leading players in the provision of innovative Private and Hybrid Cloud technology solutions. WIIT operates through managed processes, specialised resources and technology assets including proprietary data centres spread across 7 regions: 4 in Germany, 1 in Switzerland and 2 in Italy, 3 of which are Premium Zone enabled i.e. with guaranteed high availability, maximum levels of resilience and security by design; two of these host data centres certified Tier IV by the Uptime Institute. WIIT has 6 SAP certifications at the highest level of specialisation. Its end-to-end approach enables the company to provide its partner companies with customised, high value-added services with the highest security and quality standards for the management of critical applications and business continuity, while guaranteeing maximum reliability in the management of the main international application platforms (SAP, Oracle and Microsoft). Since 2022, the WIIT Group has joined the UN Global Compact. (www.wiit.cloud)
