

PRESS RELEASE

WIIT establishes WIIT Schweiz AG in Zurich: Premium cloud services and the WIIT Cloud Native Platform now fully available in the Swiss market

New Swiss headquarters in Zurich. Swiss customers gain access to the WIIT Group's full portfolio, in particular to the WIIT Cloud Native Platform, available today also in the Swiss Region with three Availability Zones

Zurich, 1 October 2026 – WIIT S.p.A. (“WIIT” or the “Company”; ISIN IT0005440893; WIIT.MI), European leader in the market of Private and Hybrid Cloud services for Critical Applications has established WIIT Schweiz AG as its Swiss company, operating under this name from the beginning of October. From its new headquarters at Vulkanstrasse 106 in Zurich, WIIT Schweiz AG will make the WIIT Group's full portfolio available to the Swiss market, from managed services for business-critical SAP, Oracle and Microsoft environments to the WIIT Cloud Native Platform (WCNP).

At the center of the Swiss portfolio is the WIIT Cloud Native Platform. Built on open standards (OpenStack, Kubernetes, CNCF), it is one of the most reliable and powerful Cloud Native platforms in Europe. In Switzerland, the Group runs the platform across three Availability Zones, operated autonomously by Swiss personnel. This gives customers significant benefits, such as no structural lock-in, direct access to the underlying layers without proprietary licenses and security by design. This modern technology stack is fully integrated into WIIT's existing managed cloud platform, which includes both standard and proprietary technologies such as IBM or Oracle. Swiss companies can therefore run Cloud Native and container-based workloads in Switzerland, keep their data in the country under Swiss jurisdiction and meet regulatory requirements, including those of FINMA, while being able to extend to Regions in Germany and Italy where cross-border capacity or resilience is required.

WIIT Schweiz is fully aligned with the Group's strategy of having the same Cloud Native footprint and evolution roadmap in each country.

The new location brings customer service, technical operations and the Swiss organization together, close to the three Availability Zones that make up the Swiss Region, underlining WIIT's long-term commitment to Switzerland.

WIIT Schweiz AG starts with an established base of Swiss customers, served by the Group's Swiss organization, which previously operated as Eonis AG and is being transformed in line with the Group's vision and technology roadmap. WIIT Schweiz AG will give its customers direct access to the Group's innovation roadmap, certifications and specialist teams, including SAP certifications at the highest level of specialization and a multi-country network of Premium Zones, including Tier IV-certified datacenters in Milan and Düsseldorf, for even greater reliability of business processes.

Delivering WIIT Schweiz AG Services from three Datacenters in Switzerland remains central for the positioning. The company relies on a Swiss organization with dedicated technical staff and services operated in the country: data resides in Switzerland and remains under Swiss jurisdiction and control. This is particularly relevant for companies in the financial services, healthcare and industrial sectors, which have demanding requirements regarding where their data is located

and how it is controlled. These customers receive solutions tailored to the Swiss market and can combine them with additional WIIT Group's services as required.

WIIT Schweiz AG is led by two Co-CEOs, Roger Bruder and Christoph Herrnkind, who are jointly responsible for the strategic and operational management of the company. Bruder brings in-depth knowledge of the Swiss market and its customers, while Herrnkind, who is also CEO of WIIT AG in Germany, connects the Swiss organization directly with the WIIT Group's vision, quality standards and strategy. This combination is designed to ensure that Swiss customers benefit equally from local proximity and from the strength of a European Group.

With this setup, WIIT is strengthening its position in a market where many companies are reassessing their cloud strategy. For mission-critical applications and demanding digital sovereignty requirements, WIIT Schweiz AG offers an alternative that allows companies to rebalance their use of US hyperscalers with cloud services operated in Switzerland, while keeping contractual, operational and technical control in the country.

Alessandro Cozzi, CEO of the WIIT Group, commented: *"Switzerland is a strategic market for us and with WIIT Schweiz AG we are giving our presence here a clear identity. Swiss companies now have access to our Group's full portfolio, including one of the most reliable and powerful Cloud Native platforms in Europe, with its own Swiss Region and further Regions in Germany and Italy, each distributed across multiple Availability Zones. We are investing in this market for the long term, in infrastructure, in our new location in Zurich and in a strong local organization."*

Roger Bruder, Co-CEO of WIIT Schweiz AG, stated: *"Our customers value proximity, reliability and clearly defined responsibilities. These principles will continue to guide the way we work. What changes is the range of services we can offer them. As WIIT Schweiz, we can now address requirements that go well beyond individual projects and locations, with a portfolio and an infrastructure base that meet the highest European standards and that we are now bringing to the Swiss market in full."*

Christoph Herrnkind, Co-CEO of WIIT Schweiz AG, added: *"WIIT Schweiz AG is fully integrated into the Group's technology roadmap and quality standards. Swiss customers benefit from the same platforms, processes and certifications that we deliver in Germany and Italy, operated in Switzerland. Together with Roger Bruder, I intend to build on this foundation to grow further in the Swiss market."*

WIIT S.p.A.

WIIT S.p.A., a company listed on the Euronext Star Milan ("STAR") segment, is a Cloud Computing market leader. Through a pan-European footprint, it operates on key markets such as Italy, Germany and Switzerland, establishing itself as a leader in the delivery of innovative Private and Hybrid Cloud technology solutions. WIIT operates through managed processes, specialized resources and technological assets, including proprietary datacenters in seven Regions: four in Germany, one in Switzerland and two in Italy. Three of these are Premium Zone-enabled, i.e., featuring high-availability guarantees, the highest levels of resilience and security by design: of these, two host datacenters certified Tier IV by the Uptime Institute. Since 2006, WIIT has been continuously certified as an SAP

Operations Partner, demonstrating excellence in the comprehensive management of SAP Private Cloud services on the various SAP platforms. The end-to-end approach supports the delivery, to partner companies, of high value-added customized services, with very high standards of security and quality, for the management of critical application and business continuity, while also ensuring maximum reliability in the management of the main international application platforms (SAP, Oracle and Microsoft). In 2022, the WIIT Group joined the UN Global Compact of the United Nations. (www.wiit.cloud).
